

## Experiential Workshop

<b>Title</b>	<b>As ever, a tribe on the way.</b>	
<b>Goals</b>	Learning how the adventure of life is a journey that belongs to human tribe. Any time we, as humans, are on the trail, we have insights and a deep reminiscence about our ancestors' life getting in touch with their resilience. The journey in experiential learning, offers a unique opportunity to meet our inner needs and even our own "script" or book of rules; on the path with other people we discover our authentic Nature and therefore we might find effective strategies to feed our own expectations, and expressing ourselves with freedom, responsibility and sense of ownership of life.	
<b>Description</b>	Travelling, hiking, walking, are dramatic tools in adventure therapy. I will escort the participants in a journey of discovery, that recalls the one of Dante Alighieri through "beyond". There are two dimension of the journey (inside and outside) and 3 status of mind. In few words it is going to be a short walk in which we will meet 3 different expression of our behavior and what is going on when I'm in a group during a journey or simply a hike. I will provide participants with some hints about sense of the journey itself, having a look to the human history. Don't worry, we will come back in this dimension in order to make changes in our personal and professional life.	
<b>Number of participants</b>	Minimum	10
	Maximum	30
<b>About the facilitator...</b>	Name	Leonardo Frontani
	Background	<p>Today I'm a IAF - CPF certified professional international facilitator based in Italy. My work deals mainly with organisational innovation, change facilitation, leadership and team development.</p> <p>Since 2014 I've been a co-founder of a school for experiential learning facilitators based in Padua (TeT) supported by Niuko/Confindustria Padua and IALT.
